

NOTE of KNOWLEDGE

<http://www.ncbi.nlm.nih.gov/pubmed/?term=bacillus+coagulans> - (BC)
388 clinical studies with (BC) 48 of which are in animals.

This is the list of FDA and AAFCO approved DFM's (Direct Fed Microbials). 42 strains have been approved for both human and animal use. Make sure you are using "legal & approved probiotics" or it will be pulled and you will have a nice long and unpleasant relationship with the FDA. If you are shopping for manufacturers make sure they know the rules so you do not pay twice, or you could end up in a very bad spot. We have all of these probiotics or can source them if we do not have them in stock when you need them.

Education and Smart buying is our obligation.

Buy wisely. If you are on Amazon note they have been known to pull and dump product that is illegal or questionable. Our probiotics are grown fresh, and independently tested for purity and authenticity.

Check your Glucosmine, Chondroitin, MSM and any supplement you are selling in this space. The FDA buys on Amazon, online, and retail. Are you legal? It is very expensive to learn a lesson on Amazon or in your online business. Our knowledge is free for you. Email: Michael@pHpets.US

Table 1 Microorganisms that are approved by FDA and AAFCO for use in DFMs

<i>Aspergillus niger</i>	<i>Bifidobacterium infantis</i>	<i>Lactobacillus reuteri</i>
<i>Aspergillus oryzae</i>	<i>Bifidobacterium longum</i>	<i>Leuconostoc mesenteroides</i>
<i>Bacillus coagulans</i>	<i>Bifidobacterium thermophilum</i>	<i>Pediococcus acidilactici</i>
<i>Bacillus lentus</i>	<i>Lactobacillus acidophilus</i>	<i>Pediococcus cerevisiae (damnosus)</i>
<i>Bacillus licheniformis</i>	<i>Lactobacillus brevis</i>	<i>Pediococcus pentosaceus</i>
<i>Bacillus pumilus</i>	<i>Lactobacillus bulgaricus</i>	<i>Propionibacterium freudenreichii</i>
<i>Bacillus subtilis</i>	<i>Lactobacillus casei</i>	<i>Propionibacterium shermanii</i>
<i>Bacteroides amylophilus</i>	<i>Lactobacillus cellobiosus</i>	<i>Saccharomyces cerevisiae</i>
<i>Bacteroides capillosus</i>	<i>Lactobacillus curvatus</i>	<i>Streptococcus cremoires</i>
<i>Bacteroides ruminicola</i>	<i>Lactobacillus delbrueckii</i>	<i>Streptococcus diacetylactis</i>
<i>Bacteroides suis</i>	<i>Lactobacillus fermentum</i>	<i>Streptococcus faecium</i>
<i>Bifidobacterium adolescentis</i>	<i>Lactobacillus helveticus</i>	<i>Streptococcus intermedius</i>
<i>Bifidobacterium animalis</i>	<i>Lactobacillus lactis</i>	<i>Streptococcus lactis</i>
<i>Bifidobacterium bifidum</i>	<i>Lactobacillus plantarum</i>	<i>Streptococcus thermophilus</i>
